

RADIOLOGICAL INCIDENT

Facilities within evacuation radius of nuclear power plants must have plans for dealing with an accident/incident at the plant. Facilities within a 50-mile ingestion zone must also have a plan of action. This section is targeted for facilities outside this 10 or 50 mile radius with children living within the radius.

Administrator's responsibilities:

- Building administrator notifies staff if an accident/incident has occurred that affects the ability of children to return to their homes (if they live within the 10-mile radius of an affected nuclear power plant).
- Procedures for release of children to emergency contact as designated by the parent(s)/guardian(s) are activated, or these children are kept at the facility until their parent(s)/guardian(s) or designee picks them up.

Staff responsibilities:

- Stay with children, if they will not be released to alternate (emergency) location, or until an authorized individual picks them up.

For non-power radiological emergencies, follow the Hazardous Materials guidelines.
